Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 10-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Schliesser et al 5,947,809.

Schliesser et al teach a method and apparatus for filling sausage casings having a producing station for producing sausage meat between an on and off producing stage. A filling station is provided for filling the sausage meat produced by said producing station. A means or sensor for determining the amount of sausage meat needed by said filling station. A control means or controller which controls the sausage meat output of said producing station. Regarding claim 2, the producing station is controlled substantially continuously on the basis of the amount of sausage meat needed by said filling station. In regards to claim 3, at least one reservoir is provided.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schliesser et al 5,947,809.

Schliesser et al do not discuss the use of a grinder, mixer or evacuator. However, these devices are notoriously well-known in the sausage making field, and as a result, are believed to be obvious to one of ordinary skill in the art at the time the invention was made to provide the apparatus of Schliesser et al. with a grinder, mixer and evacuator, in order to encompass the entire range of the sausage making field.
